Re: Cross Creek Hurricane - Repair and Bank Stabilization
City of Fayetteville, North Carolina

Subj: Letter of Recommendation

To Whom it may Concern:

The Fred Smith Company employed the services of Shamrock Environmental as a Subcontractor to assist in the Cross-Creek Hurricane Repair and Bank Stabilization Project.

The 2020 – 2021 Project included the following major items of work:

- **Streambed Debris Removal and Cleaning**
- **Restoration and Installation of Stream Channel Controls**
- **Stacked Boulder Bank Protection with Geotextiles and Geogrid**
- **Boulder Cross Vanes**
- **In Channel Constructed Riffles**
- **Boulder Toe protection**
- **Floodplain Excavation and Grading**

We would like to express our appreciation for Shamrock Environmental's professionalism and knowledge of their work items at the Cross Creek Hurricane Repair Project. Working hand in hand with Fred Smith Company, the project team made great strides through difficult weather conditions and fluctuating water levels to produce an outstanding finished product. Shamrock was able to coordinate forces with Fred Smith Company management to install a boulder protection system and preclude further erosion of the slopes and stream banks, while protecting facilities adjacent to the stream. Shamrock's personnel and resources are top tier and it would be a pleasure to work with their organization again in the future.

An additional thanks to Mike Tedaldi, Bryan Gaidanowicz, Donald Duncan, and the crew who helped make this project a success!

If you have any questions or require additional information, please don't hesitate to call.

Sincerely,

Caleb Ellis
