Re: Evergreen Packaging LLC
Landfill # 6 - Area E Development
Canton, North Carolina

Subj: Letter of Recommendation

To Whom it may Concern:

Pactiv Evergreen (Evergreen Packaging LLC) secured the services of Shamrock Environmental to construct Landfill Cell 6E, a \$5,225,000, 16-acre cell used for the non-hazardous waste generated from the Canton Mill facility.

The 2020-21 Project included the following major items of work:

- 280,000 cy of cell excavation
- 500,000 sf of 60 mil HDPE liner installation and geosynthetic clay liner
- 20,000 tons of stone installation for leachate collection system
- Construction of a leachate pump station with associated electrical work
- Installation a leachate force main system
- Erosion control and stormwater management
- Assessment and corrective actions to reinstate existing leachate line

Shamrock continues to perform successfully and would highly recommend the Shamrock team of professionals on any earth moving or landfill installation project. Overall, this is the fourth major project they have executed for me here at the Canton facility. This project continues their tradition of meeting the construction schedule and bringing project under the Project budget. Shamrock was also instrumental in assisting Evergreen to update and troubleshoot their entire leachate collection system to improve efficiency. They truly are a team player and helped make this project a success. I look forward to working with them in the future.

If you have any questions or require additional information, please don't hesitate to call.

Sincerely,
